★ Ionic Is Ionic for me, an Ember.js dev?

Apr 24

Howdy everyone!

bfcoder

I am an Ember.js dev. I am interested in writing some iOS apps using javascript. I heard about Ionic. Started looking into it. I watched the crash course video. And it appears to me that everything to do with Ionic is based on Angular.js?

So I guess here is my question: Is Ionic tightly coupled with Angular.js? And thus I should look to Phonegap to write my Ember apps? Or is that just the Ionic community prefers and Ionic plays nicely with Ember.js?

Thanks!

You should really learn about AngularJS. If you're an Ember.js developer, it will be super easy for you to make the transition. AngularJS is much better than Ember.js in almost every aspect.

alon_gubkin

Apr 24

that's excessive. I actually prefer ember's way of doing things and look forward to someday doing ionic apps with ember.

morenoh149

Apr 24

You sure? Have you checked AngularJS in depth?
